If cars are moved empty in one direction and are not returned, they will be charged as if they are loaded and switching of other cars loaded will not be considered as offsetting one-way movement of empty cars. EXTRA AND SPECIAL TRAIN SERVICE

Upon specific request of the shipper or consignee, CPR, at its sole discretion, may operate extra or special train service. Extra train service is defined as service requested by the shipper or consignee at a time or date other than the scheduled regular service. The charge for this service will be \$2,800.00 per occurrence for up to eight (8) hours of service. Charges will be assessed against the party requesting the service. Special train service is defined as accommodating shipments which cannot be handled in regular train operations because of excess weight, height, width or length and/or if the customer asks for a special movement. The charges for this service will be negotiated between CPR and the party requesting service, dependent on specific needs for the movement, cost factors and potential adverse impact to physical plant and operations on the CPR. The requesting party must comply with all insurance requirements required by CPR. Charges will be assessed against the party requesting the service, and must be paid in full within 30 days after the special service date.

Charges apply for round-trip movement from yard tracks to shop facility and return, when moving solely on the tracks of CPR. If CPR switches the empty car into the shop facility and is not the switching carrier for the eventual movement from the shop facility, then the switching charge, as named in this item, applies only on the inbound movement. Charges will be assessed at the time of the inbound movement.

Unless otherwise provided on a bill of lading or in a transportation contract, the charges in this item will be assessed against the connecting carrier interchanging the car(s) to CPR.

- Applicable on railroad owned or controlled cars.
- Applicable on private cars.

Except as otherwise provided, when CPR participates in line-haul service, cars re-switched under original load or for partial loading or unloading may be switched at the Applicable inter-terminal, intra-terminal or intra-plant rate of \$190.00 per car handled.
